Mary Beth. See note below from our Chief of Planning. Ramsey Langford from my office worked with Dominion when the line referenced was abandoned. He will contact Dominion and coordinate to make sure this will not be an issue for our project.

Subject: Gorge Follow Up Information

Good morning Mike,

I hope all is well. I am sending the following information to you so that you can be our single point of contact, to send information to the consultant, for Gorge Dam Removal sediment disposal project.

Bathometric Survey

During review of the bathometric survey and side scan radar of the backwater the presenter commented that there appeared to be an east-west mound on the bottom of the pool, just north of the former first energy site. I believe that is the abandoned gas line shown on page 6 of the attached *PIR-567 Preliminary – Test Bores_Tie-in locations_6-12-17.pdf*. The abandoned line is shown dropping to the bottom left hand corner of the sheet. This gas line was recently abandoned when Dominion directional drilled a new gas line from Hillcrest Drive south, deep under Front Street and under the future flow line of the river.

I have also included a sign in sheet which contains contact information for the Dominion staff associated with this project. They should be able to share with the consultant all pertinent information regarding the old and new gas lines.

HEC RAS

It was asked by the consultant during Friday's meeting if a scour analysis of the Front Street Bridge piers was performed. Lisa spoke with Chuck he said that a water level study was performed but as scour study was not. He stated that a scour study was needed.

Let me know if you have any questions.

Thanks,
Nick Moskos, PLA, LEED AP BD+C
